

Network Timeout

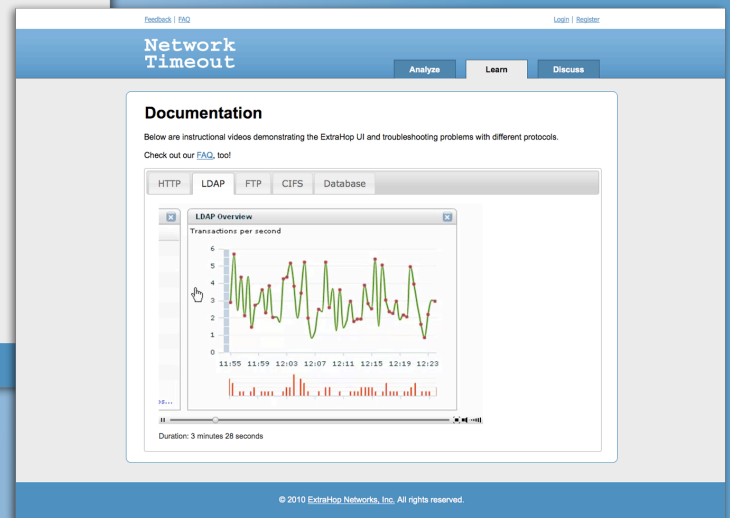

With Network Timeout, a free web service and community for IT enthusiasts and professionals, you can access the latest technology from ExtraHop Networks:

- ➔ Upload packet captures and analyze them to identify problems quickly
- ➔ Join the community to discuss and share troubleshooting tips with others
- ➔ Start with a high-level overview of network traffic and zoom in to transaction-level details

Offline transaction analysis is now free!

The screenshot shows the Network Timeout homepage. At the top, there are navigation links for "Feedback | FAQ" and "Login | Register". Below the site name, there are buttons for "Analyze", "Learn", and "Discuss". The main content area features a prominent announcement: "Offline transaction analysis is now free!". This announcement includes a line graph showing network traffic over time and a "Start Analyzing" button. Below the announcement, there are three columns of links: "Analyze Packet Captures" (with an upload icon), "Documentation" (with a document icon), and "Forums" (with a speech bubble icon). The footer contains the copyright notice: "© 2010 ExtraHop Networks, Inc. All rights reserved."

The screenshot shows the Network Timeout documentation page. It features the same navigation and site name as the homepage. The main content area is titled "Documentation" and includes a sub-header "Check out our FAQ, too!". Below this, there are tabs for "HTTP", "LDAP", "FTP", "CIFS", and "Database". The "LDAP" tab is selected, showing a window titled "LDAP Overview" with a line graph of "Transactions per second" over time. The graph shows a fluctuating line with a red trend line. Below the graph is a bar chart. The footer contains the copyright notice: "© 2010 ExtraHop Networks, Inc. All rights reserved."
